

# KRASL art fair ON THE BLUFF

## Booth Information

- Every effort is made to provide the space you requested. For accuracy of the Art Fair Guide Book, once you are assigned a space, there will be no booth changes.
- Lake Bluff Park is linear, from south to north. Non-curbside spaces have to dolly more than 70 ft. from the curb.
- Booths with a stated measurement of 10', 15' or 20' have an extra foot on each side. Booths with a stated measurement of 12', 17' or 22' do NOT have extra space beyond what's stated. Booth space is marked on the grass, and our greeters will help you locate where to set up on the bluff.
- Even numbered booths are on the bluff side; odd numbered booths are on street side. Numbering starts with # 1 on the South end of the bluff, progressing to Booth # 201 at the North end of the park.
- Electricity may be available on even numbered (bluff side) booths. No electricity is available on odd numbered booths (street side).
- The art fair setting is on the grass along a bluff. Please keep in mind this is a city park with trees, bumps and grades. The ground is uneven, so plan to **bring shims to help level your booth.**
- Because of our proximity to Lake Michigan, (think "Lake Effect!") weather can range from mild to very breezy, which can also affect the temperature. Mornings can be very cool! We strongly advise you to **bring sandbags in case of strong winds.**
